

Tech to Help Deter ATM Crimes

Express News Service

Bangalore: In the wake of rising incidents of thefts and crimes in ATMs, a security company has demonstrated a 24/7 monitored intrusion

alarm system for ATMs that uses active deterrence technology.

The company currently has 363 ATMs under surveillance in the city and 435 across the state. "The tech-

nology removes the issues we currently have with unarmed and untrained guards. It also ensures the safety of the customer when he is being mugged," an official from the company said.
